

## Live Sound Engineer And Event Technician

Live Sound Engineer with experience of Theatre, Live Music and Corporate shows and events. I consider myself to be friendly, a strong team player and committed to seeing a show completed to a high standard. I'm always willing to learn from others and I'm proactive in seeking new skills and opportunities.

I have experience with many different brands of pro audio equipment, general stagecraft skills, and some knowledge of stage lighting systems. I also have experience of some stage management as well.
